

# COMPLETE STANDARDIZATION AND MODULARITY

ASK US HOW!

**Gripping & Part Handling**

**Part Recognition**

**Robot Motion Planning**

**Precision Delivery**

**... and much more!**

**All** components of an application - not recognition alone - need to be considered in development.

The SCAPE Bin-Picking System consists of a multitude of modules to facilitate a high level of customizing - **without programming**.

All modules work together through the common SCAPE Software Suite. Our modular solution enables us to solve your particular bin-picking problems with supreme reliability and precision.
