## **SCAPE TECHNOLOGIES AND DIEP TECHNOLOGY ENTER INTO A NEW COOPERATION**

Scape has entered into a new partnership agreement with DIEP Technology – an innovative and full-service provider that carries out consulting, automation implementation as well as maintenance and service in southern Germany and in Switzerland for predominantly medium-sized companies as a contract partner.

“DIEP Technology is very happy to count among its new partners Scape Technologies - an experienced supplier in the challenging field of Bin-Picking for more than 16 years. The result of our work is complex, carefully selected and coordinated solutions. In doing so, we draw on the solutions and know-how of our renowned and international partner companies. Here we see Scape Technologies know-how and reliable Bin-Picking solutions as a perfect match in our aim of offering individually tailored quality solutions to medium-sized businesses.”, says Kemal Tugran, CEO – DIEP Technology.

“DIEP Technology core competences and expertise fits to SCAPE Bin-Picking Solutions which enable robots to perform tasks that would not otherwise be able to automate efficiently and cost-effectively. The technology is used i.e. for pick-and-place and Bin-Picking operations for automatic machine feeding, where benefits in the form of increased stability, reliability and efficiency help to ensure high profitability in automatic handling of items and which can remove monotonous working tasks and improve workers ergonomics”, says Frank Nüsken, General Manager D-A-CH Gebiet - Scape Technologies.

### **About Scape Technologies**

Scape Technologies, founded in 2004, is a focused robotics enterprise having developed a unique and patented technology to recognize, pick and place parts. This is known as the SCAPE Bin-Picker system and the systems are generally marketed in cooperation with integrators responsible for building and implementing them into various and specific production facilities. The SCAPE Bin-Picker systems are among others used in one of the world's toughest fields: the automotive industry (e.g. Ford, Nissan and BMW).

Recently Scape Technologies have launched the easy-to-install SCAPE Easy-Picker and SCAPE Mini-Picker for the Small Medium Enterprises and the SCAPE Package Picker for distribution and logistic applications.

Scape Technologies offers a complete solution with fully integrated components and software modules that together create a coherent and efficient solution that can be connected directly to the leading six-axis robot brands used in the industry – such as Universal Robots, ABB, Fanuc, Yaskawa, KUKA, and more.

Scape Technologies A/S is listed at Nasdaq First North Growth Market.
